2. Calculate the area of a circle with given radius.

```
        ( Start )
            |
            v
      +-------------+
      |  PI = 3.14  |
      +-------------+
            |
            v
      /  Read ,r  /
            |
            v
  +-------------------+
  |  area = PI * r * r |
  +-------------------+
            |
            v
      +-------------+
      |  print area |
      +-------------+
            |
            v
        ( Stop )
```
